

	Product	group	Production location	
Parma	L1		Lanklaar	
e raw materials are excavated in Weichsel loam layers, the lo	ocal loam of Aeolian o	origin dating from	n the Ice Age. This löss mainly	
nsists of a silt-like fraction, suited ideally for the manufactur	ing of hand form bric	ks. By using spec	ific sand types for surface	
vering, the desired colour is achieved.				
	Colour			
shade of red purple to blue black				
	Format			
Moulding meth	od Hand form			
DF: 214 x 101 x 65 mm		Between batches the average size and color may slightly differ.		
Essential Char	acteristics - EN771-1			
<b>EN 771-1 - CPR-97884 NOBO</b>	U	UK CA EN 771 - 1855-CPR-24914

2+		2+		
Dimensional tolerances	T2			
Range	R1			
Active Soluble Salts	S2	Torted to the hed face		
Mean Compressive strength	>= 20 N/mm <sup>2</sup>	Tested to the bed face Tested to the bed face		
Normalized Compressive strength	>= 20 N/mm <sup>2</sup>			
Dimensional stability	NPD			
Bond Strength general	0,15 N/mm <sup>2</sup>			
Bond Strength thin layer	0,30 N/mm <sup>2</sup>			
Reaction to fire	A1	Category		
Water absorption	<= 14% m/md			
Water vapour permeability	5/10			
Net dry density	1740 kg/m <sup>3</sup> (D1)			
Gross dry density	1630 kg/m <sup>3</sup> (D1)			
Thermal conductivity Lambda 50/50	<=0,60 W/m.K			
Durability against freeze thaw	F2	EN 772-22		
Dangerous substances	NL-BSB	According to Ar	inex ZA 3	
Other C	Characteristics			
	1,5 - 4.0 kg/m².min	Value according EN771-1:2011 - 5.3.8		
Initial rate of water absorption - Non-coated Bricks	(IW3)			
Initial rate of water absorption - Coated bricks	0,5 - 1,5 kg/m².min	Value according EN771-1:2011 - 5.3.8		
	(IW2)			
Freeze/thaw resistance - PTV 23-002	NPD	NBN 27-009		
Thermal conductivity Lambda 90/90	0,65 W/m.K			
Thermal conductivity Lambda Ui	0,697 W/m.K			
Thermal conductivity Lambda Ue	1,376 W/m.K

Storage & handling	Cutting	
<ul> <li>Store packs on a clean surface and cover them</li> <li>Process from multiple packs at the same time</li> <li>Follow the Vandersanden processing guidelines</li> </ul>	Dry Cutting with power tools may generate dust. This dust may contain silica or quartz particulate which may constitute a hazard. Persons undertaking work of this nature are advised to wear dust masks (FFP3).	

\* All our Coated bricks are only coated on the facing sides. Coated products are specially labeled and recognisable with a "C" logo on the top left-hand side of the packaging. Always check if using coated or non-coated bricks. Match the mortar to the specified initial water absorption.
